Re: Cuyahoga County
Inland Reclamation Inc., Landfill

Mr. Frank Palladino, Jr.
Inland Reclamation
6705 Richmond Road
Glenwillow, Ohio 44139

May 30, 1983

Dear Mr. Palladino:

This letter is in response to your correspondence dated 7 February 1983, regarding the proposed disposal of asbestos waste at the above referenced landfill.

The waste in question is generated via removal of insulation materials and is asbestos in nature.

Having considered the information submitted regarding the waste, this office does not object to its disposal at the Inland Reclamation Landfill provided:

1. The generator and landfill operator are fully aware of the Ohio and Federal waste regulations, and they have determined this waste to be non-hazardous.
2. The disposal of this waste causes no operational difficulties at the landfills.
3. The waste is disposed where the operator specifies.

Enclosed is a copy of this Agency's asbestos disposal guidelines.

We hope this letter clarifies our position on this matter. Should any questions arise, please do not hesitate to contact us.

Yours truly,

Jack L. Burgan, R.S.
District Solid Waste Scientist
Division of Land Pollution Control
